

# P4 / P4-100 central unit maintenance

## Desiccant cartridge

Code produit : 003334

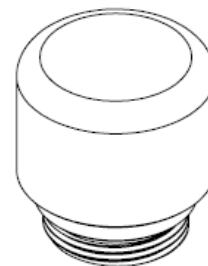

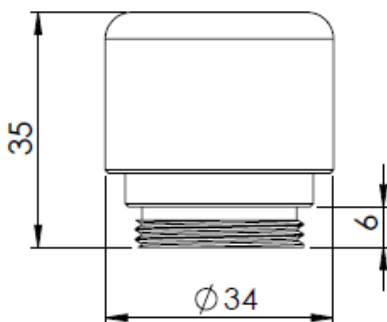

### Main features

- Maintains electronic integrity
- Easy to install
- Field-adapted
- Individually airtight pack

**The desiccant cartridge** maintains the electronic integrity of the datalogger. Easy to install, it is no longer necessary to open the datalogger to replace the desiccant bags, at the risk of pinching cables and exposing the equipment to the environment (sand, rain, etc.). Maintenance takes no more than a minute and can be carried out in the field, without tools.

### General specifications
